2020 December

PhishProof

- We have released 18 **New** templates for Phishproof. Themes include pandemic info, project collaboration, HR file sharing, election info, package delivery and more.
 - 3 Attachment templates
 - 3 Form Submission templates
 - 9 Link Click templates
 - 3 SMS templates

2020 November

Content

- **NEW** "[Invoice Fraud](#)" course released.

iLMS

iLMS v.5.81.0 (November 02, 2020, 11:00pm CST)

- Standard maintenance and bug fixes.

StatZen v1.30 (November 09, 2020, 11:00pm CST)

- Performance Improvements

2020 October

Content

NEW We've released a collection of Sexual Harassment courses

- The "Sexual Harassment: Maintaining a Respectful Workplace" series is now available as part of the Harassment Prevention Solution.
[Solution Details Here](#)
- These courses are designed to pair with other courses in the Solution to meet Connecticut training requirements.

2020 September

iLMS

StatZen v.1.29.0 (September 28, 2020, 11:00pm CST)

- **NEW** We have added a Course Utilization report which appear in the left-hand menu under Org reports.
- **NEW** A report has been linked on the header of the dashboard's Course Completion graph. This report will display transcript details for your organization.
- For improved legibility we have changed the chart type of the Phishing Sim performance graph from a line graph to a stacked area chart.
- The chart objects listed in the dashboard's report filter have been modified to be more descriptive.

iLMS v.5.79.0 (September 08, 2020, 11:00pm CST)

- Learning Path completion behavior has been changed. Courses and simulations can now be added to the end of a completed Learning Path and this new content will be assigned to learners even if they had previously reached the end of their assigned Learning Path.
- Maintenance Tasks.

2020 August

Content

- Standard Multi-lingual package of "**Working Securely from Home**" released.

iLMS

iLMS v.5.78.3 (August 24, 2020, 11:00pm CST)

- We've modified the SAML endpoint URL used for Single SignOn integrations with iLMS.
 - At this time this change will have no impact on customers currently using SSO with the system, but customers can choose to update their current integration with the new endpoint URL.
 - New integrations will utilize the updated URL format.
 - **Old:** <https://www.inspiredlms.com/Login/mycompany/consumer.aspx>
 - **New:** <https://www.inspiredlms.com/saml/consumer.aspx?on=mycompany>
- **NEW** 3 languages added for the Learner Center. Languages added: Hungarian, Romanian, and Ukrainian.
- Maintenance and Standard Bug Fixes

StatZen v.1.28.0 (August 14, 2020, 11:00pm CST)

- **NEW** Admins can now schedule StatZen report sends via email.
- More filtering options are now available on reports.
- The StatZen dashboard appearance has been changed
 - The license utilization graph now displays as a bar instead of a gauge.
 - Functions such as filtering, exports, and scheduling will display above the dashboard.
 - Admins can now view all scheduled reports by clicking the clock icon in the upper-right corner.

iLMS v.5.77.0 (August 04, 2020, 11:00pm CST)

- Updated backend control for FTP
- All remaining customers using the old Learner center have been converted to the new Learner Center

Phishproof

PhishProof v.4.3.1 (August 27, 2020, 11:00pm CST)

- We have implemented a UI change for the "Quicksend - Custom Email" campaign tool. When creating a campaign you will now have a toggle option to select from our system templates or from your custom library of templates shown as "My Templates".

PhishProof v.4.3.0 (August 21, 2020, 11:00pm CST)

- We have retired our oldest campaign building tool, previously listed as "Single Custom Email".
 - A few months ago, we released **Quick Send – Custom Email**, a new way to quickly send out phishing campaigns that improves your experience and has everything you need within a single page.
 - Not to worry, any custom email templates and landing pages created with the retired tool have been added to your account's email and landing page template library. **Learn more about this feature here:** [Customizing Email and Landing Page Templates](#)

NEW StatZen v1.18.0 Release (January 14, 2020, 11PM CST)

We have released our brand new business analytics tool, StatZen, where you can check the pulse of your organization's Security Awareness Training in one glance. Navigate to your Security First Dashboard and click "StatZen" from your top menu to access the tool.

Key features include:

- Enhanced security to ensure data integrity.
- Single Sign On – Access the business analytics tool through logging into the iLMS Admin Console.
- Four quadrants that equip administrators with the means to tell a story to the executive suite on how the organization's training efforts are attaining ROI.
 - a. License Utilization – Displays the total number of registered learners including active and inactive users.
 - b. Exam Results – Displays the overall average final exam scores for courses that include exams.
 - c. Phishing Simulation Performance – Displays the number of emails sent vs number of susceptible users by phishing simulation campaign.
 - d. Course Completion – Displays course completion status for the courses within a Learning Path.
- Each quadrant offers further drill down options.
- Exports of data in graphical representation are offered in excel, pdf, and html file formats.
- For more details visit the full article here: [StatZen Reporting for iLMS and Phishproof](#)

leL Mobile App Android v1.0.13 and iOS v1.0.9 (January 7, 2020, 11PM CST)
